

# MAKE SAFETY A PRIORITY

Everyone needs to make a commitment to proper safety and sanitation in their spa or salon. Here are ten points to consider when creating a proper plan of action.

1. Practice the strictest levels of disinfection and sanitation. Every area from reception, dressing rooms, coat rooms, facial station and treatment room needs to have thorough cleaning and sanitation before and after every service.
2. Strict adherence to state, federal, OSHA, World Health Organization (WHO) and Center for Disease Control (CDC) rules and regulations as they pertain to health safety during this crisis.
3. Provide pre-screening assessments prior to appointment. Every client, staff member or outside representative has to verify their health status prior to coming in.
  - Not have a fever over 98.6 F/ 37 C. A forehead thermometer is used at doorway by trained staff personal to document.
  - Not have a cold, cough, difficulty breathing, muscle pain or headache in past 14 days.
  - Has not been in contact with anyone diagnosed with COVID-19, sick and quarantined, in the past 14 days.
  - Not in contact with anyone with these symptoms in the past 14 days.
  - Everyone is asked to stay home if they are sick or are exhibiting symptoms of illness such as a fever or persistent cough.
4. Clients must be seen by appointment only, booked online with questionnaire and affirmation of having read and understood new rules. Each appointment requires an additional 15 minutes to sterilize room and equipment after each service. Each appointment needs to be scheduled so that there aren't more than two people in waiting area at one time.
5. PPE, including face masks and gloves, should be worn by every client and outside representative when they come in to the spa or salon. Provide clients with spa slippers upon entry to the spa or salon. Shoes must be removed at door and stored in a closable bag. Clients should continue to wear the mask through any service that does not require nose and mouth exposed, such as leg waxing, body treatments, eyebrow waxing or eye masks, or lash extensions.
6. No guests of clients are allowed.
7. Facial rooms, stations, reception area, changing rooms and lavatories need to be modified for proper social distancing. Coats, hand bags and personal items should be stored in coat room in sealed bags. Only two chairs are available in reception area, placed over 6 feet apart. Customers must stay over 6 feet from reception desk.
8. Designate one safety specialist on staff to enforce social distancing, provide rules, hand sanitizer and assist in understanding.
9. Revised menus and service protocols for enhanced hygiene and sanitation.
10. Use of Repêchage unidose professional treatments for increased hygiene and efficiency.
